

EuroSITES

European Ocean Observatory Network

EuroSITES locations (blue), associated cabled sites (green)

Real-time transmission of physical and biogeochemical ocean data

Integrating and enhancing Europe's existing deep ocean time-series observatories.

International Impact forming part of the OceanSITES network.

In situ Platforms and Sensors from the ocean interior to the seafloor and sub-seafloor

Beyond state-of-the-art

Science missions to develop sensors for:

- Ocean acidification
- Tsunami detection/early warning systems
- Deep ocean oxygen consumption
